Update Instructions for 4G Wireless WAN Driver

[Precaution]

Before updating the driver, you should

- Sign in as the administrator account.
- Terminate virus protection program and alike. (Restart them after finishing updating 4G Wireless WAN Driver.)
- Connect AC Adaptor and fully charged battery.
- Disconnect networks (wired and wireless). (Except when you download the program.)
- Disconnect all peripheral equipment.
- Terminate all programs other than the program for updating 4G Wireless WAN Driver.

[Summary of installation procedure]

1. Confirm the version of 4G Wireless WAN Driver
2. Extract the program for updating 4G Wireless WAN Driver
3. Install new version of 4G Wireless WAN Driver
4. Confirm the version of 4G Wireless WAN Driver

KEEP THESE STEPS STRICTLY, OR MALFUNCTION MAY BE CAUSED.

[Procedure]

1. Confirm the version of 4G Wireless WAN Driver

(1) Right click or touch and hold [Start] button to open the menu.
(2) Choose [Device Manager].
(3) Right click or touch and hold [Telit USB Modem] in [Modems].
(4) Choose [Properties].
(5) Check [Driver Version] in [Driver] tab.

If the version is "1.0.3.601" or later, 4G Wireless WAN Driver has already been updated. You don't need to execute the following steps.
If the version is older than "1.0.3.601", please execute the following steps.

2. Extract the program for updating 4G Wireless WAN Driver

(1) Double click the downloaded program (wwan_LN920A6_Driver_JPEU_B3104.exe). Click [Yes] if "User Account Control" window appears.
(2) Read the "License Agreement", and click [Yes].
(3) Confirm the destination folder (default is "c:\util2\drivers\wwan_3E3F4B4C_B3104"), and click [OK].
(4) Wait until files are extracted. The folder in which update files are extracted will be automatically opened on completion. It may take more than 1 minute until the folder appears.

3. Install new version of 4G Wireless WAN Driver

(1) Open the folder in which update files are extracted.

(2) Right click or touch and hold [Pinstall.bat] and click [Run as administrator]. Click [Yes] if "User Account Control" window appears.

(3) "C:\windows\System32\cmd.exe" window appears.

(4) **Please wait until the window disappears automatically.** (It takes around 10 seconds until the window disappears automatically.)

(5) Restart the computer.

4. Confirm the version of 4G Wireless WAN Driver

- Confirm the version of 4G Wireless WAN Driver is updated with the same procedure as step1.
